

CANDIDATE-POOL SHORTLISTING UNDER CONTEXT CONSTRAINTS

01 UNIVERSE

$$|U_t| = M_{\text{pool}} \in \{100, 200, 500\}$$

Held-out ground truth is in pool but not revealed to shortlisters

02 SHORTLIST

$L = 20$

C1 C2 C3

SID scorer

PRIMARY

Training-free · top- L over U_t

Random

Uniform sample · same universe

SASRec

Trained sequential baseline

GT excluded from history

03 OUTCOMES

Coverage

Recall@ L · GT reaches shortlist?

Conversion

HR@5 · NDCG@5 · absent GT $\rightarrow$ 0

LLM ranks shortlist under HM (primary); HMT is a control

Identical universes within each domain-pool-size cell · Primary contrast: SID vs random · SASRec = trained sequential baseline
